## **Custom fabricating services from Delta**

***Delta Pumps and Basement Drainage Distribution Hub is home to Delta's in-house fabrication team. Their fabrication team not only fabricates the Delta 710, 910 and 800 Series chambers (used in structural waterproofing application) but also have capability and capacity to customize pumping systems to match any size and/or configuration to your specific site requirements.***

All Delta pumping systems are fabricated from their dedicated Distribution Hub, a 3,500 sq. ft warehouse dedicated to pumping stations, packaged pump stations and basement drainage related products, from BBA Approved packaged pump stations, high water level alarms, control panels, battery backups to pipework and fittings, supporting the team's ability to meet the growing demand for quality basement drainage items.

Along with fabricated pumping systems, Delta also offers loose package systems for new or existing RC sumps.

All Delta pumping systems are fabricated to include internal class E pipework, non-return valve(s) and guide rails, where applicable.

An extensive range of *pumping stations* can suit all types of application - Ground, surface, or foul water, single or twin discharge.

The experienced inspection team thoroughly assurance check all Delta *pumping stations* before they leave the Distribution Hub to maintain *consistent, expected* quality levels of Delta pumping systems. All Delta pumping systems are usually available on a next working day delivery.

### **Specification Services**

Delta Pumps is the largest supplier of structural waterproofing application *pumping* systems. Their products are designed and fabricated in-house by specialists to ensure high standards.

The in-house team of Specification Managers are always happy to help to ensure your pumping systems suit your project. Simply complete a 'Delta Pump Specification Sheet' with your site requirements and let their teams do the rest. Delta's Pumping System Specifications are not only site specific but also include technical details and design strategy whilst confirming to British Standards and Regulations.

To aid specification simply complete the information fields in the online pump calculator tools - <https://www.deltamembranes.com/product-categories/pump-calculators/> - if pumping requirements are outside of standard stock range then click submit and their specification team will be on hand to assist.

### **Retrofitting or new**

Delta's pumping systems are suitable for new and retrofitting projects. We recommend consultation with a Delta Pumps Registered Servicing Provider/manufacturer with knowledge of pumps prior to replacing equipment to ensure the replacement pumping system operates in accordance with site specifics.

### **Always happy to help**

Whatever the needs of your project, you can rely on Delta's Technical Team to ensure you get the right advice, support, and practical help at exactly the right time its required. Call today on 01992 523 523 or email [info@deltamembranes.com](mailto:info@deltamembranes.com)
