University flats 'wow' thanks to Ultra Tile

Ceramica Fix Ltd has used popular Ultra Tile products to create the 'wow' factor in student accommodation at two of Leicester's impressive university campuses.

Long-standing Ultra Tile customer, Ceramica Fix, secured the contract from Jamie Lewis Residential, who have built several CODE student accommodation buildings.

The bathroom and kitchen in each flat were tiled by the Ceramica Fix team using Ultra Tile **Prime IT FP** acrylic surface conditioner and flexible additive, **ProSet SS** tile adhesive and **FlexJoint** super fine grout.

In this application, Prime IT FP was added to the adhesive to enhance bond and flexibility enhancing its performance.

ProSet SS was then used to tile bathroom and kitchen walls with porcelain and ceramic tiles respectively. This single part product for wall and floor applications is formulated for extended workability, allowing a 1 hour pot life. It can be used at bed thicknesses from 3-12mm in internal or external conditions.

Joint finishing was completed using Ultra Tile FlexJoint grout in white and cream. This grout boasts a super fine texture, is polymer modified for ultimate flexibility, repels water and will **not mould**. It can be used with underfloor heating and for joint widths from 1-20mm.

For more information on the Ultra Tile range of adhesives, grouts and ancillaries, please visit www.ultratileadhesives.co.uk or call 01827 871871.

Ultra Tile is a brand of the Instarmac Group plc.
