Vortice introduce the on trend Black Bathroom Fan

Vortice, a leading manufacturer of ventilation solutions, proudly announces the launch of its newest addition to the Punto Filo domestic fan range: the sleek 4" black bathroom fan. Tailor-made for modern bath or shower rooms, Vortice recognises the need for combining aesthetics with optimal ventilation performance.

The popular ultra-slim Punto Filo domestic fan range is renowned for its high airflow rate, whisper-quiet operation, and energy efficiency. It is designed for intermittent extract ventilation in bathrooms, shower rooms, en-suites, and WCs. With IPX4 splash-proof protection across all models and compatibility for wall installation, the Punto Filo range offers versatility and reliability.

The Punto Filo fans feature customisable timer settings, ranging from three to twenty minutes, allowing users to easily alter operating durations to their specific needs. Whether it is a quick shower or a long soak in the bath, the Punto Filo fan ensures optimal air quality without compromise.

"The Punto Filo range has long been a staple favourite among electrical contractors in the residential sector," says Paul Gunner, Distribution Sales Director at Vortice. "With the introduction of the black variant, we're excited to offer a contemporary option that complements modern bathroom aesthetics. The black Punto Filo fan will be readily available through our network of wholesalers across the UK and can also be purchased through our e-commerce platform at www.vortice.ltd.uk."

In a time where design and functionality go hand in hand, the black Punto Filo bathroom fan by Vortice emerges as an ideal choice for homeowners and contractors alike.
