

## APPLICATIONS

General Offices, Call Centres, Dealing Rooms, High Security Applications, and many more.

Pre-formed Holes to allow screw fixing

Galvanised Steel Trays Top and Bottom

Pre-formed Ridge to prevent snagging

## PANEL DESCRIPTION

The BGF-ES panel is a fully encapsulated construction of galvanised steel trays to the top and bottom enclosing a high density particleboard core. The trays are then glued to the core and roll formed together. This creates a fully encapsulated 600mm x 600mm panel. The screw down panel gives added strength, rigidity and security as the void is inaccessible without specialist tools.

## MANUFACTURE

The panel is manufactured in a brand new facility in Hereford that offers the customer total flexibility whilst maintaining the highest quality standard. Bathgate Flooring Ltd prides themselves on their ability to meet the customer's demands and this facility has been designed and built to meet those demands.

## CERTIFICATION

The panel has been fully tested by a NAMAS accredited laboratory to meet the requirements of PSA MOB PF2/SPU March 1992 and is certified as being fully compliant. The panel has Class 'O' spread of flame certification.

## TECHNICAL DETAILS

Panel Grade	Panel Type	Point load 25mm x 25mm	Load over 300mm x 300mm	UDL
Medium	BGF-ES	3.0kN	4.5kN	8.0kN/m <sup>2</sup>

Each Raised Access Floor has a safety factor of 3x working load

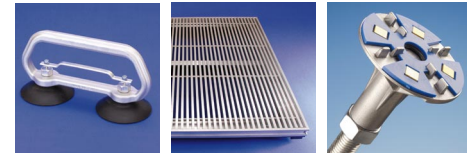

Panel Type	Panel Thickness (nominal)	System Weight (typical)
BGF-ES	31mm	36kg/m <sup>2</sup>
