## **Delta Membranes welcomes Reece Catt as Technical Manager**

***Certified Surveyor in Structural Waterproofing, Reece Catt joins Delta as Technical Manager, London & South. Reece, is a highly regarded structural waterproofing consultant whose experience spans Type A, B and C waterproofing solutions.***

"We are thrilled to have Reece join the Delta Technical Team" said Kevin Dodds, Managing Director of Delta Membrane Systems Limited. "His strong background, industry experience, and successful history in waterproofing design is the perfect match for Delta, and Reece will be instrumental in Delta's continued growth in London and the South".

"Delta's team of waterproofing specialists offers a wide range of services to businesses and individuals across London and the South, as well as nationally. Whether you have a personal or commercial need, Delta offers a high level of service. We offer pragmatic advice and an individual, friendly service. We have a

particular focus on our key qualities of understanding, responsiveness and practicality whilst being approachable. Delta's team offer the experience and expertise needed to find the right solution for you – whatever your needs may be."

"I'm looking forward to joining the team this coming Tuesday! Thank you for making me feel so welcomed even before I have started! I'm extremely excited to get to know the #DeltaTeam, the products and most importantly Delta's customers! See you all bright and early Tuesday morning! As someone who has a keen passion for robust solutions, I'm very excited to work with Delta and contribute to developing solutions using technical excellence, alongside developing my skills.

"Outside of work, I like spending time with my young family, and I am also a long-time Crystal Palace fan, so you can find me up there on the odd Saturday afternoon!"

"For anyone in the industry who already knows me, I can be counted on to always give the best advice and great customer services and I look forward to collaborating with you. Please contact me on the below details, should you seek assistance with your projects."
