GDL Air Systems products for law firm offices

When a law firm moved to new premises in Leeds, GDL Air Systems was called in to provide the grilles and diffusers needed to provide effective air distribution in the open-plan, dynamic workspace.

Addleshaw Goddard moved its offices to a Grade A building in Sovereign Square, constructed on the site of a former council owned car park. The firm's staff occupy three and a half of the five available floors, in a modern and spacious environment. The development is close to the train station and is set within a backdrop of beautiful landscaped gardens.

GDL provided fixed blade swirl diffusers, circular faced swirl diffusers, steel air valves and slimline cover grilles for this building at the heart of the Leeds bustling business sector.

By choosing GDL products for the project, the specifiers had the benefit of a British manufacturer with factories in Glossop and Sheffield who offers clients both standard and bespoke products to suit their exact requirements with competitive lead times.
