Maccaferri hosts live webinar Drainage with Geocomposites

Maccaferri have many tailored solutions for the challenges you face when deciding on drainage solutions.

This is the next webinar in the series. The live technical webinar starts on Wednesday 30th November from 12:30pm - 1:30pm.

This webinar will look at:

- What a geocomposite drain is
- Key benefits for environment and cost
- Typical applications
- Performance specification
- Design considerations

Maccaferri have many tools and advantages when approaching this, and will support their clients along the way in getting the right solution.
