

Press Release
September 23rd 2021

The Safety Letterbox Company partners with COTECH BioSafe

The Safety Letterbox exclusive partnership with Coatings Tech Limited allows them to offer an additional antibacterial coating that can be applied to their mailboxes and parcel boxes giving you extra peace of mind.

COTECH Biosafe in partnership with Microban, the global leader in antimicrobial technology, bring you a protective coating which protects surfaces, reduces costs and kills 99.9% of microorganisms. By combining, they have created a unique coating that is designed to provide durable protection for all metallic, powder coated and plastic letterbox surfaces, buildings, and public spaces.

Key Benefits of COTECH Biosafe

- Will help reduce bacteria and microorganisms by 99.9% - helping you futureproof your services.
- Adds up to 8 years onto the lifespan of your surfaces with a 9H measurement for hardness and durable protection.
- It is UV Stable which prevents discolouration and protects your surfaces.
- The coating gives 24/7 protection and works around the clock, meaning you don't have to.
- With an integrated anti-fingerprint technology, there isn't any need for harsh chemicals, just a simple microfibre cloth.
- The coating conforms to UK Fire Safety Standards.

Contact The Safety Letterbox on 01639 633525 <https://www.safetyletterbox.com/> to discuss this additional benefit that can be added to a range of products.
